

**POCKET GUIDE TO
PROFESSIONAL REGISTRATION**
for engineers and technicians

2021/22

Foreword

The most recent Ipsos MORI Veracity Index shows that engineers are the third most trusted profession in Britain, only ranking lower than doctors and nurses. Our vision – and our purpose as the regulator – is that society continues to have confidence and trust in the engineering profession.

In this 40th year of the Engineering Council, we continue to deliver public benefit through maintaining internationally recognised standards of competence and commitment for the engineering profession, and licensing competent institutions to champion those standards.

Every engineer and technician professionally registered as a Chartered Engineer (CEng), Incorporated Engineer (IEng), Engineering Technician (EngTech) or Information and Communications Technician (ICTech), has demonstrated their competence against an independent standard. They have also committed to maintaining and enhancing that competence through Continuing Professional Development (CPD) and to complying with a Code of Conduct. Our online tool [RegCheck](#) can be used to verify an individual's Engineering Council registration.

In our 2025 Strategy, 'Advancing Regulation', we set out our aspiration to see professional registration moving from being seen as a 'benefit to the registrant' to being an 'expectation of the individual'. As the importance of competence becomes increasingly clear in all areas of life, standards matter.

Our Strategy highlights the important role we have in convening expert opinion not only about competence, commitment and professional development, but also over-arching issues such as ethics, sustainability, safety and security. The success criteria for our 2025 Strategy are:

- a more diverse and inclusive profession
- a more digitally innovative profession

- an internationally respected standard
- an engineering profession with sustainability and ethical principles at its core.

During 2021, we have updated our 'Guidance on Sustainability', supported and enabled the launch of the UK Cyber Security Council in March 2021 (as part of the Cyber Security Alliance) and are working closely with the Royal Academy of Engineering to build on our joint 'Statement of Ethical Principles', ensuring an ethical culture remains at the heart of the engineering profession. The Engineering Council maintains a series of mutual recognition agreements and international relationships to facilitate the mobility and recognition of professionally registered engineers and technicians across the world.

A crucial element of our Strategy is the focus on collaboration with our stakeholders and how this approach to strategic partnering can be used to build and develop our current activities. The professional engineering institutions we licence, alongside our Professional Affiliates, are vital to the delivery of the Engineering Council's work. I hope this guide provides a helpful overview of those institutions and to the process of becoming professionally registered.

It is more important than ever for professional engineers and technicians to demonstrate – to employers, to clients, to government and to society as a whole – that we deserve the trust placed in us.

Alasdair Coates BEng (Hons) MSc CEng FICE MCIHT CMIOSH
CEO, Engineering Council

About this guide

This pocket guide aims to provide key information about registration with the Engineering Council and explains the relationship between the many organisations working within the professional engineering community. More information, including our guidance documents and other Engineering Council publications are available on our website www.engc.org.uk

This guide sets out how to become professionally registered, including the relevant Standards, and provides profiles of the licensed professional engineering institutions and Professional Affiliates, to support you in finding the most relevant institution for your needs.

Data in this guide was correct (as supplied to the Engineering Council) at the time of publication and we will endeavour to keep the digital version up to date as we are notified of any changes. The most up to date version will always be available at www.engc.org.uk/pinkbook

To notify us of any changes needed to this guide, please contact marketing@engc.org.uk with an update.

Engineering Council

*Established in 2002. Earliest forebears: Council of Engineering Institutions (1965) and Engineering Council UK (2002).
Incorporated by Royal Charter in 1981.*

As the UK regulatory body for the engineering profession, the Engineering Council sets and maintains internationally recognised standards of professional competence and ethics. These are detailed in the UK Standard for Professional Engineering Competence ([UK-SPEC](#)).

Mission: To maintain internationally recognised standards of competence and commitment for the engineering profession, and to license competent institutions to champion the standards for the deliverance of public benefit.

Vision: That society continues to have confidence and trust in the engineering profession.

Companies House Incorporation number: RC000779

Registered Charity number: 286142

Engineering Council Register

The Engineering Council holds the national Register of over 229,000:

- Engineering Technicians ([EngTech](#))
- Incorporated Engineers ([IEng](#))
- Chartered Engineers ([CEng](#))
- Information and Communications Technology Technicians ([ICTech](#))

Holders of these titles must be members of a professional engineering institution licensed by the Engineering Council (these institutions are formally known as Licensees) or, in some cases, a Professional Affiliate. In order to achieve registered status individuals are assessed by their institution and found to demonstrate the relevant standard of engineering competence and commitment. This includes committing to the code of conduct and behaving in an ethical way.

The award and retention of these titles therefore ensures that employers, government and wider society - both in the UK and overseas - can have confidence in the knowledge, experience and commitment of engineers and technicians on the Register.

In addition, there are around 8,000 engineers and technicians on the national Register holding interim registration having registered their intention to work towards one of the professional titles above. Learn more about [interim registration](#).

International context

The Engineering Council is committed to supporting its professionally registered engineers and technicians working in the UK and in other countries. The professional titles EngTech, IEng and CEng are recognised widely around the world. Professional registration, as defined in UK-SPEC, reflects the requirements of global engineering.

Engineers who have developed their professional engineering competence in countries outside of the United Kingdom are welcome to join the Engineering Council register, subject to meeting the assessment criteria.

For further information see: www.engc.org.uk/international

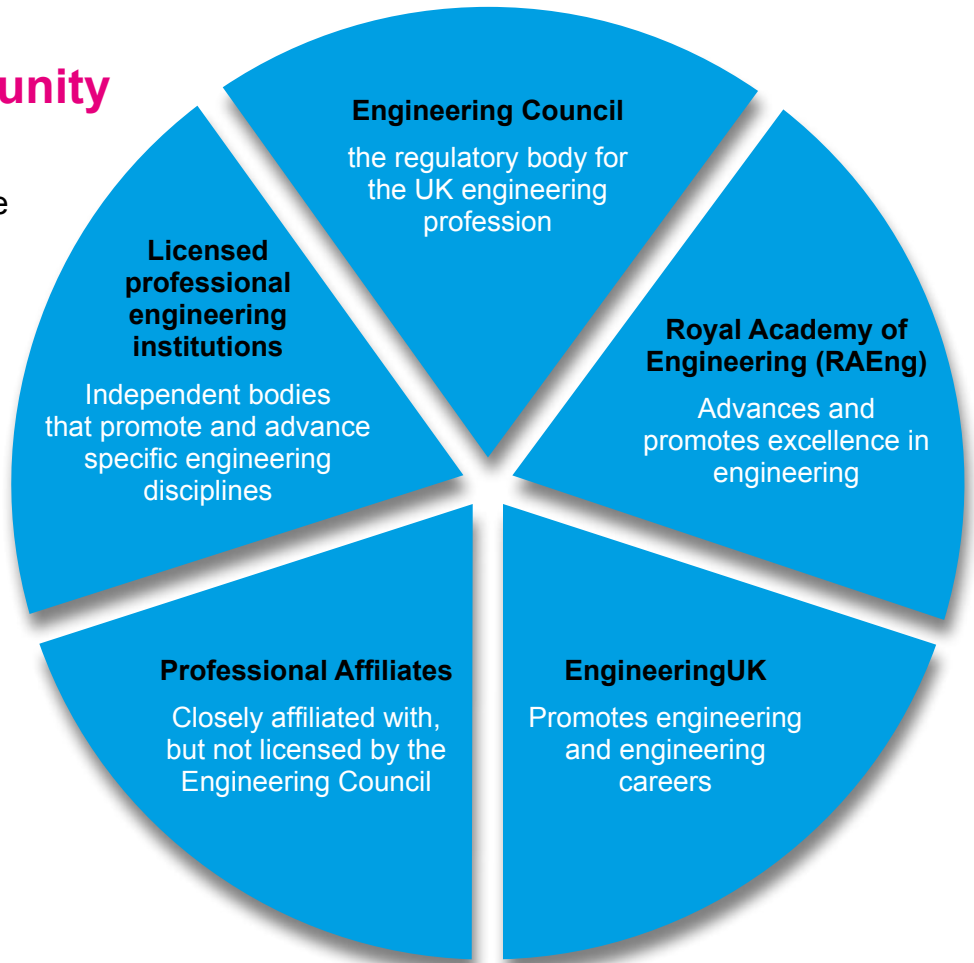

Governance

The Engineering Council is governed by a Board of Trustees, who are appointed in accordance with its Bye-laws. Fifteen are appointed to represent the licensed professional engineering institutions, and seven are appointed by EngineeringUK to represent industry. Much of the organisation's work is undertaken through the assistance of numerous volunteers and also through committees and panels, which comprise wide industry representation.

The professional engineering community

Our partners at the heart of the engineering profession

Our partners at the heart of the engineering profession

Licensed professional engineering institutions have around 750,000 members in the UK and overseas. They are:

- Independent bodies that promote and advance specific engineering disciplines
- Licensed by the Engineering Council to assess professional registration and, in some cases, approve or accredit qualifications and apprenticeships
- Crucial to maintaining professional standards
- Generally set up with educational charitable status and receive no core public funding
- A key source of policy advice
- Now formally known as “Licensees” in the Engineering Council’s Royal Charter.

www.engc.org.uk/peis

Professional Affiliates are:

- Closely affiliated with, but not licensed by the Engineering Council
- Similar to licensed professional engineering institutions as independent learned societies that promote and advance specific engineering disciplines
- Able to process members for registration through agreements with licensed professional engineering institutions.

www.engc.org.uk/pas

RAEng has over 1,500 Fellows across all engineering sectors and:

- Advances and promotes excellence in engineering
- Takes a lead on engineering education, invests in research to underpin innovation and growth
- Provides analysis and policy support to government
- Coordinates a unified policy voice for engineering
- Receives funding from a variety of sources including government.

www.raeng.org.uk

EngineeringUK promotes engineering and engineering careers. It:

- Focuses on learners (and their influencers) via the Big Bang Fair and Tomorrow's Engineers
- Produces research reports and briefings
- Coordinates a unified voice for engineering to the public
- Is a charitable body core funded by registered engineers and technicians.

www.engineeringuk.com

2025 Strategy

On 1 July 2021, the Engineering Council launched its 2025 Strategy 'Advancing Regulation'.

Our four key themes are:

- Diversity & Inclusion (D&I)
- Digital Innovation
- International
- Engineering & Society

Find out more and read the full document at:

www.engc.org.uk/strategy

Professional registration

What is professional registration?

- The process in which an individual is admitted to the Engineering Council's Register as EngTech, IEng, CEng or an ICT*Tech*.
- It verifies that an individual can meet the engineering and technological needs of today, while also anticipating the needs of, and impact on, future generations.
- To achieve professional registration the individual must demonstrate, via a peer review process by a licensed professional engineering institution, that they have met the profession's Standards of commitment and competence, and commit to development through Continuing Professional Development (CPD).
- Both in the UK and overseas, professional registration gives employers, government and society confidence in registered engineers and technicians.
- Individuals who have been awarded a professional registration title may use the relevant post-nominal.
- It is open to any competent practising engineer or technician, with different levels and pathways to registration available.
- People who gain further qualifications or experience over the course of their careers can be assessed for another registration title. Many people continue to develop their competence to enable them to move from EngTech to IEng or CEng, or from IEng to CEng.

Why register?

The post-nominals EngTech, IEng, CEng and ICT*Tech* provide benefits for individuals, including recognition, career development, earning potential.

Professional registration sets individual engineers and technicians apart from those who are not registered. Gaining a professional title establishes a person's proven knowledge, understanding and competence to a set standard and demonstrates their commitment to developing and enhancing competence.

- Greater influence within own organisation and industry
- Demonstration of work ethic valued by employers and customers
- Improved career prospects and employability
- International recognition of competence and commitment
- Evidence of expertise and hard work
- Enhanced status leading to higher self-esteem
- Credibility with peers across the profession
- Recognition as authorised countersignatory.

Further benefits for individuals are available at:

www.engc.org.uk/benefits

Read our [case studies](#) of how registration has benefitted the careers of professional engineers and technicians across numerous sectors.

Benefits for employers:

There are many benefits for organisations that employ professionally registered engineers and technicians, including assurance of quality.

These include:

- Globally accepted assurance that the employee has satisfied a rigorous assessment of their engineering competence
- Increased technical and managerial credibility
- Confirmation that the engineering credentials being claimed are actually held
- Internationally recognised titles enable greater flexibility in staff mobility
- Positive impact on recruiting and retention, and indication of commitment to staff
- Possible mitigation of potential liabilities if an accident or incident occurs as registrants are governed by a Code of Professional Conduct.
- Knowledge that registered employees have a personal obligation to abide by a code of conduct
- Enhanced company reputation through ethical behaviour
- A means to satisfy requirements of Quality Management Systems eg ISO 9001.

Maintaining registration requires continued membership of a Licensee and a commitment to CPD. This means employers can be reassured that registered employees are developing and enhancing their competence and will be exposed to new developments in their profession.

Further benefits for employers are available at: www.engc.org.uk/employers

Benefits for society:

- Society can have confidence in the work of professionally registered engineers and technicians whether they operate in the UK or globally
- Assurance of ethical and sustainable behaviour.

The four categories of professional registration: EngTech

Engineering Technician (EngTech)

Engineering Technicians apply proven techniques and procedures to solve practical engineering problems. Engineering Technicians are required to apply safe systems of work and are able to demonstrate:

1. Contribution to either the design, development, manufacture commissioning, decommissioning, operation or maintenance of products, equipment, processes or services
2. Supervisory or technical responsibility
3. Effective interpersonal skills in communicating technical matters
4. Commitment to professional engineering values.

www.engc.org.uk/engtech

“ *Being professionally registered opens up new avenues of training and professional development, and also gives you access to a wide community of like-minded engineers who can share resources and expertise on a particular subject.*

[Euan Maclean case study](#)

Euan MacLean EngTech MIMechE ”

The four categories of professional registration: IEng

Incorporated Engineers (IEng)

Incorporated Engineers maintain and manage applications of current and developing technology, and may undertake engineering design, development, manufacture, construction and operation.

Incorporated Engineers are able to demonstrate:

1. The theoretical knowledge to solve problems in developed technologies using well proven analytical techniques
2. Successful application of their knowledge to deliver engineering projects or services using established technologies and methods
3. Contribution to project and financial planning and management together with some responsibility for leading and developing other professional staff
4. Effective interpersonal skills in communicating technical matters
5. Commitment to professional engineering values.

www.engc.org.uk/ieng

“ *There are many benefits I gained upon registration. It was recognised by my employer and they gave me a pay rise. It also boosts my confidence and increases my career potential.*

[Mark Anthony Santiago case study](#)

Mark Anthony Santiago BSc IEng MIET GMICE

The four categories of professional registration: CEng

Chartered Engineers (CEng)

Chartered Engineers develop solutions to engineering problems using new or existing technologies, through innovation, creativity and change. They may be accountable for complex systems with significant levels of risk.

Chartered Engineers are able to demonstrate:

1. The theoretical knowledge to solve problems in new technologies and develop new analytical techniques
2. Successful application of the knowledge to deliver innovative products and services and/or take technical responsibility for complex engineering systems
3. Responsibility for financial and planning aspects of projects, subprojects or tasks
4. Leading and developing other professional staff through management, mentoring or coaching
5. Effective interpersonal skills in communicating technical matters
6. Commitment to professional engineering values.

www.engc.org.uk/ceng

“ I am particularly proud to be a Chartered Engineer in the manufacturing industry because it can be difficult for others to understand my role. Being a CEng demonstrates my technical competence to the highest level. It can be useful when meeting new contacts in a group situation, because being a CEng singles me out as the technical expert.

[Helen Cavill case study](#)

Helen Cavill CEng MIMechE MIET ”

The four categories of professional registration: ICTTech

ICT Technician (ICTTech)

Information and Communications Technology Technicians apply proven techniques and procedures to the solution of practical engineering problems.

Information and Communications Technology Technicians are able to demonstrate:

1. ICT knowledge and understanding to apply technical, practical and systems skills
2. Evidence of their contribution to the design, development, configuration, testing, commissioning, installation, deployment, operation, migration or maintenance of ICT solutions, products, processes, systems, services or applications
3. Technical and personal responsibility
4. Effective communication and interpersonal skills
5. The ability to operate in accordance with safe systems of work and to demonstrate appropriate understanding of the principles of sustainability
6. Commitment to professional engineering values.

www.engc.org.uk/icttech

ICTTech case studies are currently being developed, alongside the revised ICTTech Standard – check our website at www.engc.org.uk/casestudies soon.

How to become professionally registered

The first step to registration is membership of one of the professional engineering institutions licensed to assess candidates, or a [Professional Affiliate](#) with the relevant registration agreement. These are listed on pages 46-49 of this guide and on the [Engineering Council website](#).

The institution will assess the individual's qualifications, training and experience against UK-SPEC or ICT*Tech* requirements and advise if anything further is required. Many institutions can also help with finding a suitable mentor.

The assessment process – known as a Professional Review – starts with a written application based on the requirements of the institution. A detailed description of the format for this will be provided by the institution. For EngTech qualifications, depending on the licensed professional engineering institution, there may be an interview, or it may simply be a one-stage process assessing an applicant's submitted written evidence. For CEng and IEng titles the Professional Review process has two stages: an assessment of written evidence and then an interview. Once the registration criteria have been met, the institution will submit a registration form to the Engineering Council on behalf of the candidate.

Eligibility

Professional registration is open to everyone who can:

- Demonstrate both competence to perform professional work to the necessary standards, and commitment to maintain their competence
- Work within professional codes
- Participate actively within the profession.

Knowledge, understanding and skills form an essential part of competence. This provides the necessary foundation of underpinning logic and analytical capabilities. Knowledge, understanding and skills ensure that decisions are based on a full understanding of engineering practices and standards, rather than relying on instructions.

Formal education is one way of demonstrating the necessary underpinning knowledge and understanding, but it is not the only way. Many potential registrants have not had formal training to the required level but are able to demonstrate they have acquired the necessary underpinning knowledge through substantial work experience. Applicants who have acquired their underpinning knowledge and understanding through experiential learning or other qualifications can submit the relevant information to their licensed professional engineering institution for an initial assessment.

Pathways to professional registration

Step 1:

Recognised qualifications

Individual assessment

Step 2:

Professional Review of competence and commitment

Applicants are assessed against the UK-SPEC or ICTTech

Professional Review Interview (PRI)

All IEng and CEng applicants will be interviewed by a panel of registered engineers

Step 3:

Professional Registration

The recommendation from the Professional Review is reviewed by the licensed professional engineering institution's relevant committee

Step 1:

Recognised qualifications

For applicants who have achieved the required learning outcomes through recognised qualifications. Qualifications which provide the required level of knowledge and understanding are:

- EngTech: Level 3 qualification as part of an approved apprenticeship scheme
- ICTTech: Level 3 of the Qualifications and Credit Framework/National Qualifications Framework for England and Northern Ireland
Level 6 of the Scottish Credit and Qualifications Framework (SCQF)
Level 3 of the Credit and Qualifications Framework for Wales.
- IEng: an accredited Bachelors degree
- CEng: an accredited integrated Masters degree or a combination of accredited Bachelors and Masters degrees.

Individual assessment

Applicants who do not have the recognised qualifications will instead have an individual assessment of their qualifications and any other relevant learning such as:

- formal academic programmes
- in-employment training
- experiential learning
- self-directed learning

Applicants may also be asked to write a technical report or attend a technical interview.

The assessment will be carried out by registrants who are also members of the licensed professional engineering institution. The exact process is set out by the institution.

Step 2:

Professional Review of competence and commitment

Applicants are assessed against the UK-SPEC or ICT*Tech* standard of competence which sets the minimum requirements. Licensed professional engineering institutions may add requirements which relate to their particular engineering discipline.

An expert panel, consisting of registered engineers from the licensed professional engineering institution, will review an applicant's portfolio of evidence against the requirements.

This is followed by:

Professional Review Interview (PRI)

All IEng and CEng applicants will be interviewed by a panel of registered engineers who are also members of the licensed professional engineering institution. EngTech applicants may need to attend a Professional Review Interview.

The panel will then make a recommendation on whether the applicant meets the requirements for their chosen registration category.

Step 3:

Professional registration

The recommendation from the Professional Review is reviewed by the licensed professional engineering institution's relevant committee. The applicant will achieve professional registration if:

- The expert panel recommends that the applicant has met the requirements
- All are satisfied that all stages of the process have been completed, and
- The licensed professional engineering institution's relevant committee endorses the recommendation.

The applicant then becomes a registrant and is able to use the relevant post-nominal. As a condition of continued registration, the individual commits to:

- Maintain their competence through CPD and membership of their licensed professional engineering institution, and
- Adhere to their licensed professional engineering institution's Code of Professional Conduct.

If an applicant has been unsuccessful the licensed professional engineering institution will provide some guidance on what further learning and/or competence development would be beneficial to achieve registration.

When all the above steps are completed to the satisfaction of the licensed professional engineering institution's relevant committee, the applicant achieves professional registration. They commit to maintain their CPD and membership of their licensed professional engineering institution and to adhere to its Code of Professional Conduct.

The Standards

UK-SPEC and ICT*Tech* Standard

Professional registration with the Engineering Council is based on demonstration of competence and commitment. The UK Standard for Professional Engineering Competence (UK-SPEC) describes the competence and commitment requirements that have to be met for registration as an EngTech, IEng or CEng. The ICT*Tech* Standard provides the same information, but for ICT*Tech* registration. Both Standards include examples of activities that could demonstrate achievement of the professional registration requirements, to enable individuals and employers to find out whether they or their staff can meet the requirements. Academic and vocational qualifications that exemplify the required knowledge and understanding are also listed, however, it should be noted that there are other ways of demonstrating achievement.

UK-SPEC and the ICT*Tech* Standard also contain an explanation of the steps necessary to achieve professional registration; the requirement to maintain and enhance competence once registered; and the obligations to act with integrity and in the public interest that are placed on registrants through their membership of a licensed professional engineering institution.

The Engineering Council revises the Standards every five years. The latest edition of UK-SPEC will be implemented from 31 December 2021 and of the ICT*Tech* Standard from 31 March 2022. More information and downloadable versions are available at: www.engc.org.uk/standards.

What is competence?

Competence is defined as a professional's ability to carry out engineering tasks successfully and safely within their field of practice. This includes having the individual skills, knowledge and understanding, personal behaviour and approach, to be able to work collaboratively with others to achieve the intended outcomes.

Competence includes the ability to make professional judgments and an awareness of the limits of one's own ability and knowledge in order to seek assistance when required.

What is professional commitment?

Registered engineering professionals are required to demonstrate a personal and professional commitment to society, to the environment and to their profession. As part of demonstrating overall competence, it is mandatory to show that they have adopted a set of values and conduct that maintains and enhances the reputation of the profession. This includes:

- Maintaining public and employee safety
- Undertaking work in a way that protects the environment and contributes to sustainable development
- Complying with codes of conduct, codes of practice and the legal and regulatory framework
- Managing, applying and improving safe systems of work
- Carrying out the CPD necessary to maintain and enhance competence in relation to duties and responsibilities
- Exercising responsibilities in an ethical manner
- Recognising inclusivity and diversity
- Adopting a security-minded approach
- Actively participating within the profession.

Maintaining and enhancing competence

Candidates applying for professional registration must be committed to CPD, which is essential for maintaining and enhancing the required competence and commitment, as well as for developing new competences. It underpins the value of the professional titles of EngTech, ICTech, IEng and CEng, and enables society to have confidence in the engineering profession.

CPD has several purposes:

- To assure continuing competence in a current job
- To prepare for a different role
- To follow a longer-term career development plan
- To enhance professionalism in a wider context than a specific job role.

Registrants will be required to show evidence that they have taken steps to ensure this commitment, and that they intend to continue to do so in line with the CPD Code for Registrants. The licensed professional engineering institutions sample registrants' CPD records each year and provide feedback on submitted samples. Submitting a CPD record is mandatory for registered engineers and technicians.

CPD Code for Registrants

Engineering Technicians, Incorporated Engineers, Chartered Engineers and ICT Technicians should take all necessary steps to maintain and enhance their competence through CPD. In particular, they should:

- Take ownership of their learning and development needs and develop a plan to indicate how they might meet these, in discussion with their employer, as appropriate
- Carry out a variety of development activities, both in accordance with this plan and in response to other opportunities which might arise
- Record their CPD activities
- Reflect on what they have learned or achieved through their CPD activities and record these reflections
- Evaluate their CPD activities against any objectives they have set and record this evaluation
- Review their learning and development plan regularly, following reflection and assessment of future needs
- Support the learning and development of others through activities such as mentoring and sharing professional expertise and knowledge

At Professional Review, all applicants will need to demonstrate how they meet their CPD obligations and show that they understand that this requires an ongoing commitment. Find out more and see the CPD Code for Registrants at www.engc.org.uk/cpd

mycareerpath®

[mycareerpath®](#) is an online tool for engineers and technicians to plan, record and evaluate their professional development (PD). Users can record activities and experience that contribute to their PD and build up a body of evidence that can be shared with institutions, employers or colleagues.

mycareerpath® is aligned with [UK-SPEC](#) for EngTech, IEng, CEng and the *ICTech* Standard.

mycareerpath® is managed by the Engineering Council, and many licensed professional engineering institutions and Professional Affiliates are currently licensed to offer the system to their members.

Guidelines for Institution Codes of Professional Conduct

All registrants are expected to observe the requirements of the Code of Conduct of the institution they have joined.

The Code of Professional Conduct of each licensed professional engineering institution and each Professional Affiliate is a key element of the contract of membership between the member and the Institution. This Code places a personal obligation on members to act with integrity and in the public interest. It also refers to the [Statement of Ethical Principles](#), published jointly by the Engineering Council and the Royal Academy of Engineering.

Recognised qualifications

Accreditation of degrees

Accreditation offers a mark of assurance that a degree programme will provide a student with some or all of the underpinning knowledge, understanding and skills that will set them in good stead for eventual professional registration.

The Accreditation of Higher Education Programmes (AHEP) has been adopted by the Quality Assurance Agency for Higher Education (QAA) as the subject benchmark statement for engineering.

Degree programmes may be accredited by one or more of the professional engineering institutions licensed to do so by the Engineering Council. Importantly, engineering employers as well as academics are involved in the setting of standards, in advising on programme developments, in reviewing degrees and in the decision-making process about whether to confer accredited degree status. Accredited status confers market advantage to Higher Education Institutions (HEIs) and provides a structured and rigorous mechanism ensuring the quality and relevance of degree programmes, and the opportunity for licensed professional engineering institutions and HEIs to work together for mutual benefit and public good.

Approval and accreditation of qualifications and programmes

Other qualifications and programmes (including higher apprenticeships) may be approved or accredited by licensed professional engineering institutions. These are primarily vocational qualifications, or work based programmes such as apprenticeships that deliver some or all of the underpinning knowledge and understanding and/or competence for the purposes of EngTech, IEng or ICT*Tech* registration.

The approval process looks at the overall design, coverage and assessment strategy for programmes that may be delivered in multiple locations and seeks evidence that satisfactory quality assurance arrangements are in place. Accreditation looks at programmes delivered in a specific location.

A qualification from a recognised course is not necessary for registration - there are other routes.

Search for degrees, qualifications and apprenticeships that have been recognised as fully or partially meeting the education requirement for EngTech, IEng, CEng or ICT*Tech*, at www.engc.org.uk/courses

Registration fees

2022 Annual registration fees

Title	Final Stage	Interim Stage	Retired/Hardship (Final Stage Only)*
CEng	£41.72	£14.90	£18.87
IEng	£35.40	£14.90	£15.70
EngTech	£20.30	£14.90	£9.00
ICT <i>Tech</i>	£20.30	£14.90	£9.00

*Criteria for the payment of reduced fees are at the discretion of the registrant's licensed professional engineering institution.

2022 Registration entry fees

Title	Final Stage	Interim Stage
CEng	£54.25	£11.12
IEng	£45.80	£11.12
EngTech	£18.77	£11.12
ICT <i>Tech</i>	£18.77	£11.12

NB: The registration entry fee includes the first year's registration fee.

Details of current registration fees and international registration fees are available at:
www.engc.org.uk/fees

How the fees are used

Initially the fees are paid to the licensed professional engineering institution through which the individual is registered. The institution then passes them on to EngineeringUK, who in turn make a grant to the Engineering Council to keep the standards under review, operate the Register and quality assure the licensed professional engineering institutions. The remaining sum is used by EngineeringUK to promote the engineering profession. This includes producing EngineeringUK's research reports and briefings, supporting the Tomorrow's Engineers programme and The Big Bang Fair.

Lapsed registration

A registrant may be reinstated to the Register within three years of lapsing, but will be required to pay an administrative fee. If the registration has lapsed for more than three years, the individual must reapply to one of the licensed professional engineering institutions and will be subject to a full professional review. For further details on reinstatements and the process for readmission to the Register, please contact your institution.

International recognition

Professional registration with the Engineering Council is open to anyone who is able to demonstrate they have attained the relevant competences, regardless of nationality or location.

The main focus of the organisation's international activity falls in two areas:

- Ensuring that the standards set in the UK are globally recognised
- Facilitating the international mobility of engineering professionals.

To do this, the Engineering Council works with numerous national, regional and international engineering organisations on a number of specific mutual recognition agreements and facilitates compliance with UK legislation that supports the recognition of professional qualifications.

The Engineering Council is a founder member of the International Engineering Alliance (IEA), an umbrella group that oversees seven international agreements relating to the recognition of standards for the accreditation of engineering education and professional engineering competence. This includes acting as the UK signatory to three international education accords in addition to the membership of three professional competence agreements. These accords and agreements can streamline the requirements for registration in each of the signatory countries.

Within Europe, the Engineering Council is the UK National Member of the European Federation of National Engineering Associations (FEANI), which aims to facilitate the mutual recognition of engineering qualifications in Europe and to strengthen the position, role and responsibility of engineers in society. The Engineering Council is also a founder member of the European Network for Accreditation of Engineering Education (ENAE), which promotes mutual recognition of engineering education programmes accredited to a European framework.

Further information is available on the Engineering Council website at www.engc.org.uk/international

The right to practice engineering is regulated differently in different countries, and some areas of work (usually safety-related) may be restricted to licensed or otherwise approved persons. While UK professional registration does not automatically meet these requirements in every jurisdiction, it does represent an internationally-recognised standard of professional competence.

Guidance for professional engineers and technicians

The Engineering Council has produced guidance material for professional engineers and technicians on their roles and responsibilities in dealing with sustainability, risk, whistleblowing, ethics and security. This guidance is intended also to be of help to all those working in engineering. They are all fully compatible with [UK-SPEC](#), and include principles to guide and motivate. Each publication is available to view and download at: www.engc.org.uk/guidance

Ethical principles

The Royal Academy of Engineering and the Engineering Council have jointly created a [Statement of Ethical Principles](#) to guide engineering practice and behaviour, which includes four fundamental principles, designed to form the core of the codes of conduct published by the licensed professional engineering institutions. These express the beliefs and values of the profession, which the Engineering Council believes all those engaged in engineering should work in accordance with.

Risk

Risk is inherent in the activities undertaken by engineering professionals, and members of the profession have a significant role to play in managing and limiting risk. All professional engineers and technicians are under a personal obligation to maintain and enhance their competence in their area of practice. The generic, top level and profession-wide [Guidance on Risk](#) establishes principles to help professional engineers and technicians ensure that risk is an important consideration in all their engineering activity. The six principles help to guide individuals in identifying, assessing, managing and communicating about risk.

Security

Security can be defined as the state of relative freedom from threat or harm caused by deliberate, unwanted, hostile or malicious acts. It operates on a number of levels ranging from national security issues to countering crime. [Guidance on Security](#) sets out six principles to guide engineers and technicians in identifying, assessing, managing and communicating issues about security.

Sustainability

Engineering professionals have a significant role to play in helping society achieve a more sustainable way of living. They work to enhance the welfare, health and safety of all, paying due regard to the environment and the sustainability of resources. The [Guidance on Sustainability](#) sets out six principles to support professional engineers and technicians when making decisions for clients, employers and society that affect sustainability.

Whistleblowing

Whistleblowing is defined by the UK Whistleblowing Commission as ‘the raising of a concern, either within the workplace or externally, about a danger, risk,

malpractice or wrongdoing which affects others’. [Guidance on Whistleblowing](#) provides support to engineers and technicians when confronted by a potential whistleblowing situation. It sets out the processes that engineers and technicians should follow in raising such a concern, and where to get advice.

Licensed professional engineering institutions

The Engineering Council's Royal Charter empowers it to give formal recognition to those engineering related professional bodies which satisfy criteria set down in its Bye-laws. These recognised bodies are formally known in the Royal Charter as Licensees.

Whilst there are numerous technical provisions to be assessed, the principal requirements are that a licensed professional engineering institution is deemed to have sufficient experience, procedures and resources to undertake the following tasks:

- Assess the competence and commitment of candidates for registration
- Monitor the CPD of registrants
- Monitor the conduct of registrants.

Professional engineering institutions may also be licensed to accredit academic programmes and professional development schemes.

Benefits of membership

There are many benefits of membership with a licensed professional engineering institution, which may include:

- Recognition of the member's professional status, which may include post-nominals
- Support and guidance with ongoing professional development, including registration
- Technical regional events, seminars, conferences, webinars often at a special rate
- Monthly journals and other technical publications
- Access to technical libraries
- Careers advice
- Health and legal advice
- Specialist interest groups
- Networking opportunities
- Access to online resources in 'members only' areas
- Awards and prizes.

Membership benefits can vary between institutions. For a full list of what each individual licensed professional engineering institution offers please visit the relevant website.

Please note that all registration numbers on the following pages are correct as at 31 December 2020. They represent fee-paying, final stage registered members only.

Professional engineering institutions licensed to award professional registration

Data in the table is subject to change or addition, please refer to the Engineering Council's website for the most up to date information.

Although [Professional Affiliates](#) are not granted licences to award professional registration, they may register their members through an agreement with one of the licensed professional engineering institutions listed below.

All registration numbers provided are correct as of 31 December 2020.

Professional engineering institutions - the first step to becoming professionally registered

The first step to becoming professionally registered with the Engineering Council as an EngTech, IEng, CEng or ICTech is membership of a licensed professional engineering institution. The institution will act as the awarding body for your registration.

When choosing which institution to contact it is best to join one closest to the discipline of engineering you work in, or study. They will be best placed to assess your competence for professional registration. If you find that there are two or three suitable institutions, you might wish to join more than one, or contact all those suitable to choose which best meets your needs.

The Chartered Institute for IT (BCS)

Established in 1957. Incorporated by Royal Charter in 1984.

Sector: IT and Computing

About: BCS, The Chartered Institute for IT, is committed to making IT good for society. The Institute sets standards for IT professionals and uses the power of its networks to bring about positive, tangible change. With the spotlight increasingly on IT professionals, the Institute provides a trusted, powerful and positive reference point for the IT sector within wider society.

Members: Members include individuals working across all industries and businesses where Information Technology is playing an increasing role. Disciplines include:

- Information Technology Strategy and Leadership
- Enterprise and Solutions Architecture
- Software Development
- IT Service and Operations
- Information and Data Management and Analytics
- Security
- Information Technology Infrastructure
- Academia and Thought Leadership.

Approximate number of members: 58,000

Licensed to award:	EngTech	IEng	CEng	
Registered members:	-	172	4,855	

Grades of Membership: Student; Associate (AMBCS); Professional (MBCS); Fellow (FBCS); Chartered Professional Registrations: Chartered IT Professional (CITP); Registration for IT Technicians (RITTech); Engineering Council registration; Registration for Informatics Professionals in Health and Social Care (FEDIP).

Specialist interest groups: Over 50 specialist groups.

[Member benefits](#)

Structure: Over 40 UK branches, 12 international sections and 42 student chapters.

British Institute of Non-Destructive Testing (BINDT)

*First established in 1954 as Society of Non-Destructive Testing.
Incorporated in 1969.*

Sector: Non-destructive testing and condition monitoring

 **About:** BINDT is the professional institute for all those engaged in non-destructive testing (NDT) and condition monitoring. It is concerned with the education, training and professional development of people and the advancement of the science and practice of the field of NDT.

There are many different forms of NDT, but the principle methods are: radiography; ultrasonic; eddy current; leak testing; acoustic emission; liquid penetrant; and magnetic particle. NDT is applied to all engineering materials and products, including metallic, plastic and composite materials in the cast, fabricated and wrought conditions.

Mission: To promote the advancement of the science and practice of NDT, condition monitoring, diagnostic engineering and all other associated materials and quality testing disciplines.

Members: Members are those who work in or have an interest in NDT condition monitoring, diagnostic engineering or materials, and quality testing in general.

 **Approximate number of members:** 1,700

Chartered Association of Building Engineers (CABE)

Building Engineers make buildings perform better: more inclusive, safer for all and sustainable over time.

Sector: A unifying voice within the construction industry

 **About:** Chartered Association of Building Engineers (CABE) is a member-focused non-profit organisation that brings like-minded professionals together.

Mission: CABE is a unifying voice within the construction sector. Bringing together members, who work across the life-cycle of the built environment specialising across a wide range of disciplines, CABE shares knowledge, raises standards and develops professionals, enabling them to meet the highest standards we all expect of them. By supporting our members CABE improves collaboration and competency ensuring that buildings meet our essential human needs, today and tomorrow.

Members: Members are involved in the design, construction, evaluation and maintenance of the built environment.

 **Approximate number of members:** 9,000

Licensed to award:	EngTech	IEng	CEng	
Registered members:	-	-	25	

Grades of Membership: Student; Technician (Tech CABE); Associate (ACABE); Graduate (Grad CABE); Chartered Member (MCABE); Chartered Building Engineer (MCABE Chartered Building Engineer); Chartered Fellow (FCABE Chartered Building Engineer).

Chartered Institution of Building Services Engineers (CIBSE)

First established in 1897 as Institution of Heating and Ventilation Engineers. Merged with Illuminating Engineering Society in 1976. Incorporated by Royal Charter in 1976.

Sector: Building services engineering

 **About:** CIBSE is the standard setter and authority for building services engineering. It publishes guidance and codes which are internationally recognised as authoritative, and sets the criteria for best practice in the profession. The Institution speaks for the profession and so is consulted by government on matters relating to construction, engineering and sustainability. It is represented on major bodies and organisations which govern construction and engineering occupations in the UK, Europe and worldwide.

Mission: To advance and promote the art, science and practice of building services engineering, to invest in education and research, and to support our community of built environment professionals in their pursuit of excellence.

Members: Members include those working in heating; ventilating; electrical wiring; acoustics; telecommunications; security; fire; safety; internal transportation; public health; façade engineering; digital engineering; building modeling and simulation; local exhaust ventilation; and facilities management.

 **Approximate number of members:** 20,000

Registration agreements with other institutions: Institute of Refrigeration (IoR).

Chartered Institution of Civil Engineering Surveyors (CICES)

Established in 1969. Incorporated by Royal Charter in 2009.

Sector: Construction

 **About:** CICES is an international qualifying body dedicated to the regulation, education and training of surveyors working within civil engineering. It prides itself on its achievement as an internationally renowned centre of excellence in the art and science of civil engineering surveying to serve the public and satisfy the needs of the construction industry throughout the world.

Mission: To advance the science and art of civil engineering surveying in all aspects of the specialisations of geospatial engineering and commercial management within civil engineering for the benefit of the public, by upholding and advancing the standards of education, competence, practice and conduct of its members.

Vision: To be recognised as the foremost UK-based professional institution for specialists employed in geospatial engineering and commercial management in the civil engineering industry.

Members: Members include: civil engineers; surveyors; and individuals interested in the construction industry.

 **Approximate number of members:** 5,000

Chartered Institution of Highways & Transportation (CIHT)

Established in 1930. Incorporated by Royal Charter in 2009.

Sector: Highway, transport and traffic engineering

 **About:** CIHT is a charity, learned society and membership body. The Institution is the leading voice for the transport infrastructure profession and a prime source of advice for national and local government and other strategic stakeholders when they are seeking technical expertise and knowledge to guide future policy and investment.

Mission: To be committed to excellence; support our members and advance their professional standing; inspire lifelong learning; generate and share knowledge and demonstrate transport infrastructure's contribution to a prosperous economy and a healthy and inclusive society.

Vision: World-class transportation infrastructure and services.

Members: CIHT represents and qualifies professionals who plan, design, build, manage and operate transport and infrastructure, embracing all aspects of transport infrastructure while continuing to value its roots in highway engineering. Members work for transport consultancies, contractors, local authorities, and in research and academia.

 **Approximate number of members:** 14,300

Registration agreements with other institutions: Institute of Quarrying (IQ) and the Institute of Asphalt Technology (IAT).

 Licensed to award:	EngTech	IEng	CEng	
Registered members:	130	268	810	
Registered via agreements:	2	-	3	

 **Grades of Membership:** Student; Apprentice; Graduate (GradCIHT); Associate (AMCIHT); Member (MCIHT); Fellow (FCIHT).

 **Specialist interest groups:** A number of specialist areas are represented through CIHT's technical panels. The Society of Road Safety Auditors (SoRSA) is a large specialist interest group with an active membership of around 300.

Chartered Institute of Plumbing and Heating Engineering (CIPHE)

First established in 1906 as Institute of Plumbers. Incorporated by Royal Charter in 2008.

Sector: Plumbing and heating

About: CIPHE is the UK's professional body for people who work in the plumbing and heating industry. The Institute's prime objective is to improve the science, practice and principles of plumbing and heating engineering for the public interest.

Mission: To operate as an independent technical and professional focal point, and be a catalyst for the plumbing and heating industry by providing technical and professional standards, expertise, education and technical innovation to the operatives within its scope.

Vision: To create an environment in which the public will receive the benefit of a protected environment and enhanced sustainability together with improved safety and health through the provision of correctly installed, commissioned, maintained and decommissioned plumbing and heating systems.

Members: Members include: plumbers; qualified owner managers; sole proprietors; designers; lecturers; inspectors; and consultants. The Institute has a category for students who are studying for an accredited qualification in plumbing or heating engineering.

Chartered Institution of Water and Environmental Management (CIWEM)

Granted Royal Charter in 1995. First established in 1987, a merger of Institution of Public Health Engineers, Institution of Water Engineers and Institute of Water Pollution Control.

Sector: Water and environmental management

 **About:** CIWEM is the leading international Royal Chartered professional body dedicated to the water and environment sectors, representing and supporting a community of thousands of members globally working towards a safer, more sustainable world. CIWEM members are committed to improving water and environmental management as well as associated social and cultural issues, for the benefit of the public. Through its professional expertise, CIWEM provides valuable advice on policy and practice, giving independent guidance for government, academia, the media and the public. As an independent charity, it champions professional standards, impartiality and the use of scientific evidence in the management of the environment.

Mission: To build a global community of water and environmental professionals dedicated to working for the public benefit.

Members: Members are employed throughout the environment and water sectors, including: senior management; engineering and scientific posts in local authorities; water companies; regulatory bodies; consultants; contractors; government departments; universities; environmental and conservation organisations; and the private sector.

 **Approximate number of members:** 10,000+

Licensed to award:	EngTech	IEng	CEng	
Registered members:	14	199	1,329	

Grades of Membership: Student; Apprentice; Graduate; Technician Member (TechCIWEM); Member (MCIWEM); Chartered Member (C.WEM); Fellow (FCIWEM).

Energy Institute (EI)

*First established in 1926 as the Institute of Fuel.
Incorporated by Royal Charter in 2003.*

Sector: Energy

About: The Energy Institute brings global energy expertise together. It is the leading chartered professional membership body for the energy industry, supporting around 20,000 individuals working in or studying energy and 200 companies worldwide. The EI provides learning and networking opportunities to support professional development, as well as professional recognition and technical and scientific knowledge resources on energy in all its forms and applications.

Mission: To develop and disseminate knowledge, skills and good practice towards a safe, secure and sustainable energy system. In fulfilling this mission, the EI addresses the depth and breadth of the energy sector, from fuels and fuel distribution to health and safety, sustainability and the environment. It also informs policy by providing a platform for debate and scientifically-sound information on energy issues.

Members: Members encompass the full range of energy industry sectors including: oil; gas; solid fuel; renewables; energy management; and nuclear. EI is uniquely placed to offer a natural home to those employed in any part of the energy sector and in any role.

Approximate number of members: Around 20,000.

Licensed to award:	EngTech	IEng	CEng	
Registered members:	20	119	1,885	

Grades of Membership: Student; Associate Member (AMEI); Affiliate; Technician Member (TMEI); Member (MEI); Fellow (FEI); Honorary Fellow (HonFEI).

INCOSE UK

Established in 1994. Incorporated in 1998.

Sector: Systems engineering

 **About:** INCOSE UK was founded to develop and disseminate the transdisciplinary principles and practices that enable the realisation of successful systems. INCOSE UK connects Systems Engineering professionals with educational, networking, and career-advancement opportunities in the interest of developing the global community of systems engineers and systems approaches to problems. We are also focused on producing state-of-the-art work products that support and enhance Systems Engineering best practice. INCOSE UK is represented on engineering organisations and committees which govern engineering, promote best practice and set engineering standards both within the UK and globally. INCOSE UK is affiliated to the International Council on Systems Engineering.

Mission: To promote the definition, recognition, understanding and practice of systems engineering in UK industry, academia and government.

Members: Our members are drawn from all engineering domains and are involved in all aspects of systems and their lifecycles from concept through to operational use and eventual disposal, covering both technical and management processes.

Institution of Agricultural Engineers (IAgrE)

Established in 1938. Incorporated in 1960.

Sector: Agricultural and landbased industries

 **About:** IAgrE is the professional body for engineers, scientists, technologists and managers in agricultural and allied landbased industries, including: forestry; food engineering and technology; amenity; renewable energy; horticulture; and the environment.

Mission: To achieve the vision through being an effective provider of services that enhance the professional competence and status of engineers, technicians, technologists and scientists operating in the landbased sector.

Vision: To be seen increasingly as the professional body of choice for engineers, scientists, technologists and managers working in agricultural and allied landbased industries, including: forestry; food engineering and technology; amenity; renewable energy; horticulture and the environment.

Members: Members are engineers, scientists, technologists and managers working in agricultural and allied industries including forestry, food processing and agro-chemicals. Their activities cover a broad technical and administrative spectrum in engineering research; design; manufacture and testing; marketing; teaching; training; consultancy; contracting and farming.

Institution of Civil Engineers (ICE)

Established in 1818. Incorporated by Royal Charter in 1828.

Sector: Civil engineering and infrastructure

 **About:** ICE is one of the world's leading civil engineering institutions. It supports civil engineers and technicians by awarding internationally recognised professional qualifications, ensuring they work to high standards and helping them to develop their careers.

ICE's work also includes many other activities, from inspiring school students about civil engineering to influencing government investment in infrastructure. It is a leading source of professional expertise in transport; water supply and treatment; flood management; waste; and energy.

Mission: To improve lives by ensuring the world has the engineering capacity and infrastructure systems it needs to allow our planet and those who live on it, to thrive. Our values remain anchored in expertise and generosity.

Vision: The ICE is an externally facing, global beacon of excellence, respected for being exciting, trusted, authoritative, insightful, proactive, ethical, fair and above all, independent.

Members: ICE's members are very diverse. They are spread across the world, with almost a quarter outside the UK. They have a variety of backgrounds, are at different stages of their careers and work in a wide range of sectors.

Sector: Chemical, Biochemical and Process Engineering

About: Founded in 1922, IChemE is the global professional membership body and learned society for chemical, biochemical and process engineers.

Mission: We aspire to be a peer-group leader for all those delivering chemical engineering activities, regardless of discipline. We want to be recognised by our members globally as 'led by members, supporting members and serving society'. We will realise our vision when we achieve these four aims:

1. We are respected for our professionalism and technical competence.
2. We are recognised as a vibrant learned society that materially impacts on the Global Grand Challenges.
3. We are acknowledged as a peer-group leader in which an engaged membership receives and adds value.
4. We are known as a high-performing organisation delivering significant value.

Members: Members include process engineers; specialists in research, design, safety and project management; process operators; technicians and apprentices.

Institution of Engineering and Technology (IET)

First established in 1871 as the Society of Telegraph Engineers. Incorporated by Royal Charter in 1921. Merger in 2006 of Institution of Electrical Engineers and Institution of Incorporated Engineers.

Sector: Engineering and technology

 **About:** IET is a world-leading professional organisation sharing and advancing knowledge to promote science, engineering and technology across the world. It provides a Professional Home for Life® for engineers and technicians and is a trusted source of essential engineering intelligence.

The Institution was formed in 2006 by a merger of the Institution of Electrical Engineers (IEE) (est.1871) and the Institution of Incorporated Engineers (IIE) (est.1930).

Mission: To inspire, inform and influence the global engineering community, supporting technology innovation to meet the needs of society.

Vision: Working to engineer a better world.

Members: Members provide a positive role in science, engineering and technology. They work in a wide range of disciplines in the following sectors: built environment; design and production; energy; information and communications and transport.

 **Approximate number of members:** 157,000

Registration agreements with other institutions: Institute of Telecommunications Professionals (ITP).

 Licensed to award:	EngTech	IEng	CEng	ICTTech
Registered members:	5,453	9,744	42,584	929
Registered via agreements:	1	5	3	9

 **Grades of Membership:** Student; Apprentice; Associate; Technician (TMIET); Member (MIET); Fellow (FIET); Honorary Fellow (HonFIET).

 **Specialist interest groups:** Numerous regional groups.

[Member benefits](#)

 **Structure:** 100+ local networks in 150 countries around the world.

Institute of Explosives Engineers (IExpE)

Established in 1974. Incorporated in 2012.

Sector: Explosives engineering for civil and defence purposes

 **About:** IExpE is the professional home for all involved in explosives and explosives engineering. It promotes explosives safety and the occupational competency, education and professional standing of those who work with explosives. It also provides consultative facilities for organisations and government departments within the explosives field.

Mission: To promote the occupational competency, education and professional standing of those who work with explosives and provide consultative facilities for organisations and government departments within the explosives field.

Vision: To be the natural professional home for all involved in explosives and explosives engineering.

Members: Members are associated with the explosives industry and their jobs involve all aspects of explosives from research and development through to disposal. Members include: engineers; scientists; logisticians; academics; shotfirers; specialist practitioners; and legislators.

Institution of Fire Engineers (IFE)

Established in 1918. Incorporated in 1924.

Sector: Fire engineering and fire and rescue services

 **About:** IFE upholds professional standards within all public and private fire sectors by offering assessment of knowledge, experience and development, and engages with major stakeholders to offer international conferences, identify and promote good practice and enhance technical networks worldwide. It is also an Office of Qualifications and Examinations Regulation (Ofqual) recognised awarding organisation.

Mission: To advance and improve the knowledge, practice and recognition of all fire professionals.

Members: Members are involved in a number of areas such as: fire dynamics including ignition, chemistry and toxicology; consultations with government in the drafting and implementation of fire safety legislation and regulations; structural fire protection of buildings; fire insurance and arson investigation; behaviour pattern of persons faced with emergencies; fire detection and alarm systems; fire appliances; and automatic fire fighting systems.

Institution of Lighting Professionals (ILP)

*Established in 1924 as Association of Public Lighting Engineers.
Incorporated in 1928.*

Sector: Lighting

 **About:** ILP is the UK and Ireland's largest and most influential professional lighting association, dedicated solely to excellence in lighting. Its key purpose is to promote excellence in all forms of lighting. This includes: interior; exterior; architectural; sports; road; flood; emergency; tunnel; security; festive lighting; and design and consultancy services. It also has strong links with other professional UK lighting bodies such as the International Association of Lighting Designers (IALD).

Vision: To unite the skills of engineering, design and technology in order to deliver quality lighting for the built environment and achieve public benefit.

Members: Members include: lighting designers; consultants; manufacturers; architects and engineers, covering interior; exterior; sports; road; flood; emergency; tunnel; security and festive lighting, as well as design and consultancy services.

 **Approximate number of members:** 2,100

Institute of Marine Engineering, Science & Technology (IMarEST)

*Established in 1889 as Institute of Marine Engineers.
Incorporated by Royal Charter in 1993.*

Sector: Marine

📖 About: The IMarEST is an international membership body and learned society bringing marine engineers, scientists and technologists together. The largest marine organisation of its kind, it spans 128 countries and works to promote the scientific development of marine disciplines, providing opportunities for the exchange of ideas and practices and upholding the status, standards and expertise of marine professionals worldwide.

It is a non-governmental organisation (NGO) with consultative status at the UN's International Maritime Organisation (IMO), observer status at the Intergovernmental Oceanographic Commission, International Hydrographic Organisation, the London Convention/London Protocol (LC/LP) and Joint Group of Experts on Scientific Aspects of Marine Environmental Protection (GESAMP) and it has special consultative status with Economic and Social Council of the United Nations (ECOSOC).

Mission: To work with the global marine community to promote the scientific development of marine engineering, science and technology, providing opportunities for the exchange of ideas and practices and upholding the status, standards and expertise of marine professionals worldwide.

Vision: A world where marine resources and activities are sustained, managed and developed for the benefit of humanity.

Members: Members work in a vast range of professions including: ship design; coast and ocean mapping and hydrography; construction; maintenance and decommissioning; defence and naval engineering; marine renewable energy; offshore oil and gas; marine engineering systems and equipment; marine safety and security; marine conservation; power and propulsion; marine biology; climatology and marine meteorology; oceanography; and natural hazards assessment.

Institution of Mechanical Engineers (IMechE)

Established in 1847. Incorporated by Royal Charter in 1930.

Institution of
**MECHANICAL
ENGINEERS**

Sector: Mechanical engineering

 **About:** IMechE is a leading professional engineering institution, connecting members globally to the world of mechanical engineering.

We provide professional support, learning and development at every career stage - from college and university, working life and through to retirement.

Whether you volunteer with us, use our professional development online tools, network with industry peers, attend events, webinars or our training, or stay up to date with the latest engineering news through our magazine or app and much more – our member benefits can help you develop and succeed.

Wherever you want to be, the Institution can help take you there.

Vision: We strive to improve the world through engineering by developing engineers; promoting engineering; informing opinion and encouraging innovation.

Members: Our members work at the heart of the most important and dynamic industries and sectors in the world.

Institute of Measurement and Control (InstMC)

Established in 1944. Incorporated by Royal Charter in 1975.

Sector: Automation, measurement (instrumentation) and control (processes and systems)

About: InstMC is committed to promoting the professional excellence of engineers and technologists at all levels in the automation, instrumentation, control and related industries. Its aims are to advance the science and practice of measurement and control technologies and their various applications; to foster the exchange of views and the communication of knowledge and ideas in the activities; and to promote the professional qualification and standing of its members. The Institute is therefore both a learned society and a professional qualifying body occupying a niche in the automation focused industries.

Members: Members typically work in measurement and control, systems science or in a variety of engineering disciplines underpinned by measurement (especially electrical/electronic, mechanical or chemical). Mathematicians, physicists and chemists (particularly analytical chemists) are also represented in membership. Major areas of work are instrumentation companies, end users (process industries, utilities, transport) and contractors.

Approximate number of members: 3,500

Institution of Royal Engineers (InstRE)

Established in 1875. Incorporated by Royal Charter in 1923.

Sector: Military engineering and science

About: InstRE was established in 1875 for the advancement of military science and engineering. Its members maintain engineering expertise that allows the Army to understand, live, move and fight. They do this by providing the infrastructure and life support systems necessary to live and operate on deployed operations. Members also provide mobility for the UK's Armed Forces both at home and overseas through the construction of roads, bridges and airfields, whilst denying their use to others, protecting the forces through protective structures, search and explosive ordnance disposal.

Mission: A learned society that seeks to advance the art and science of military engineering by sharing experiences, best practice and emerging thinking; the institution will address challenges head on, seek innovation, provide answers as it evolves in order to maintain relevance through the 21st Century.

Vision: A vibrant Institution providing innovative solutions in complex environments.

Members: Membership is open to officers, warrant officers, senior and junior non-commissioned officers (NCOs), both Regular and Reserve, serving in or retired from the Corps of Royal Engineers. Soldiers, or Sappers as they are known, join as Apprentice Technician Members. It may also be offered to those serving, or who have served, in the Engineer arm of the land forces of the Commonwealth, former Dominions, Colonies, Dependencies and Allied nations, and civilians with appropriate backgrounds.

Institute of Acoustics (IOA)

Established in 1974. Incorporated in 1974.

Sector: Acoustics, noise and vibration

 **About:** IOA is the UK's professional body for those working in acoustics, noise and vibration.

Mission: To promote our vision through the advancement of the art, science, engineering and technology of acoustics.

Vision: To see members across all disciplines recognised as professionals of the highest integrity and competence.

Members: Members work in most of the major educational, industrial, planning and consultancy establishments and their areas of expertise include: aerodynamic noise; architectural acoustics; auditory acoustics; building acoustics; electroacoustics; engineering dynamics; environmental acoustics; infra- and ultra-sonics; musical acoustics; noise and vibration; physical acoustics; speech; transportation noise; and underwater acoustics.

They might work in architectural and engineering consultancies on projects as diverse as opera houses, stadia, schools, the automotive industry, sonar and many other fields and have qualifications in electrical or mechanical engineering, physics or mathematics.

Institution of Structural Engineers (IStructE)

The Institution of
StructuralEngineers

Established in 1908. Incorporated by Royal Charter in 1934.

Sector: Structural engineering

About: The Institution of Structural Engineers is the world's largest membership organisation dedicated to the art and science of structural engineering. It is a global institution for a global profession.

Mission: To accredit and support highly qualified structural engineers for the safe, sustainable and efficient design, construction, adaptation, maintenance and refurbishment of buildings, bridges and other structures worldwide.

Vision: To lead, support and nurture the development of structural engineering worldwide. It seeks to achieve this by promoting world-class standards of technical skill, safety, efficiency, innovation and excellence in structural engineering.

Members: Structural engineers work closely with architects and construction professionals and are a key part of the project team. They work to build a huge range of structures, from small-scale home extensions to bridges and sports stadia. Institution membership confirms competence as an engineer working to the highest standards in the world. Only the best thinkers, designers and innovators successfully meet our rigorous entrance requirements.

Nuclear Institute (NI)

Established in 2009, a merger of British Nuclear Energy Society and Institution of Nuclear Engineers. Incorporated in 2008.

Sector: Nuclear / Energy

 **About:** NI is the UK membership organisation and professional body for all who work in the nuclear sector. It maintains the highest standards of nuclear professionalism through the Nuclear Delta® and helps the careers of its members through continued learning, networking and professional registration. The Institute consists of nine UK regional branches and the Young Generation Network (YGN). Of importance to the NI is the education and training of nuclear professionals, it works alongside partners to promote nuclear professionalism throughout the sector from certified apprentice programmes to continuing professional development at seminars and workshops to engaging in government consultations.

Mission: The advancement of nuclear professionalism through education relating to nuclear energy, and its application and ancillary subjects.

Members: Members include scientists and engineers worldwide, many of whom are leading figures in the nuclear industry. Their work ranges from fuel production to reprocessing, through plant design, construction and operation, and includes its maintenance, decommissioning and dismantling plus research and development to meet the industry's needs for industrial and medical use.

Permanent Way Institution (PWI)

Established in 1884. Incorporated in 1908.

Sector: Rail

 **About:** PWI is a modern professional engineering institution for engineers working in or with the railway industry. Its main objective is to collect and share technical knowledge and best practice across the industry. It increases the skills of railway engineers, raises standards, and improves efficiency through its services and close links with the industry.

Mission: To provide technical knowledge, advice, and support to all those engaged with railway infrastructure systems worldwide.

Members: Membership is open to individuals and companies operating in, or with an interest in, the railway industry. Members work principally in the field of railway infrastructure engineering and associated disciplines. The PWI welcomes all engineers: those professionally registered or working towards it, and others working or interested in the sector, who wish to benefit from the knowledge and support provided by the Institution.

Royal Aeronautical Society (RAeS)

Established in 1866. Incorporated by Royal Charter in 1949.

Sector: Aerospace and Aviation

About: As the world's only professional body dedicated to the entire aerospace community, RAeS was established in 1866 to further the art, science and engineering of aeronautics and has been at the forefront of global developments ever since.

Mission: To ensure the advancement of aeronautical art, science and engineering and to promote that species of knowledge which distinguishes the profession of aeronautics.

Vision: To be recognised as the premier resource for aeronautical knowledge, debate and opinion and maintain the highest professional standards across all aeronautical disciplines.

Members: Membership is open to all, from those with an interest in the sector to those who are studying or working within the aerospace or aviation industry.

Approximate number of members: 25,000

Safety and Reliability Society (SaRS)

*Established in 1980 to provide a forum for safety and reliability practitioners.
Registered with Companies House and Charities Commission in 1989.*

Sector: All sectors across industry

 **About:** The Safety and Reliability Society is the professional body for safety, reliability and risk management practitioners. We provide our members with cross-industry learning, CPD and networking opportunities. We are internationally recognised as the leading body for domain expertise through technical seminars, journal, knowledge-base, webinars and membership. We encourage the application of industry standard safety and reliability techniques by individuals, organisations and governments. We provide an international forum for experts to exchange knowledge, information and best practice.

Mission: To represent engineers, scientists and practitioners working in the important fields of safety and reliability and to disseminate knowledge about safety, reliability and related fields.

Members: Members are safety and reliability practitioners who work at various levels across all industry sectors and in academia.

Society of Operations Engineers (SOE)

Established in 2000, a merger between Institute of Road Transport Engineers (1944), Institute of Plant Engineers (1946) and Bureau of Engineer Surveyors (1965). Incorporated in 2000.

Sector: Operations engineering

 **About:** SOE provides support for individuals and organisations to work in safe operating environments through education, training and industry-recognised accreditations. It establishes and maintains standards of competence and conduct for those engaged in technically proficient operations engineering by prioritising safety and sustainability. Through its professional sectors of IRTE (Institute of Road Transport Engineers), IPlantE (Institution of Plant Engineers), BES (Bureau of Engineer Surveyors), and new sectors Environmental Engineers and Operations, SOE directly influences the road transport, plant, engineer surveying and environmental sectors respectively, developing best practice and improving compliance.

Mission: To promote safe, efficient and sustainable operations engineering to the benefit of society.

Members: Ranging from students and apprentices to engineering managers and directors, our members are involved in creating and establishing best practice, through original and contemporary initiatives designed to improve operations and the wider society.

Equipped with an understanding of how engineering can best add value, our members are often found in acquisition, commissioning, maintenance, asset management, and product development teams.

 **Approximate number of members:** 16,000

The Welding Institute

Established in 1923. Incorporated in 1999.

Sector: Welding, joining and allied technologies

 **About:** The Welding Institute is the leading professional engineering institution responsible for the professional registration and certification of welding and joining personnel worldwide. It embraces a professional institution, a certification body, a training organisation and a world renowned research and technology centre.

The Welding Institute fosters a deep-seated knowledge base in the development of occupational standards and vocational qualification. As an influential lobbying group, it offers authoritative guidance to statutory bodies like the British Standards Institution and even central government, charged with making the rules.

Mission: To deliver globally recognised and valued qualifications and personal membership services in welding, joining and allied technologies to an expanding membership base.

Vision: To be the world-class professional engineering institution for welding, joining and allied technologies.

Members: Members are professionals and associates working across a number of industries using different technologies, including: welding; coating; fabrications; materials; polymers, NDT, structural integrity; inspection and more.

Professional Affiliates

[Professional Affiliates](#) are engineering institutions closely associated with, but not licensed by, the Engineering Council. They are an influential group, each of which has furthered the knowledge and understanding of a particular area or aspect of engineering and technology.

The benefits of affiliation, for which partner organisations pay an annual fee, include the opportunity to offer professional registration to their members through an agreement with an existing licensed professional engineering institution. Access to information becomes available for staff and members via the Engineering Council's Partner Portal, networks and annual seminars, plus they have the opportunity to contribute to industry developments. Several Professional Affiliates have themselves progressed to licensed professional engineering institution status.

Membership benefits are similar to those of the licensed professional engineering institutions, but please visit the relevant Professional Affiliate's website for full details.

Please note that all registration numbers on the following pages are correct as at 31 December 2020. They represent fee-paying, final stage registered members only.

Association of Cost Engineers (ACostE)

Established in 1961. Incorporated in 1962.

Sector: Engineering; manufacturing; construction; services and project management

 **About:** ACostE represents the professional interests of those with responsibility, at all levels, for the quantification, planning, management and control of processes and resources (including cost and time), across all work activities.

Mission: To provide services for members to enable them to advance in, and to promote the application of, scientific principles and techniques in the disciplines of: estimating, monitoring, controlling and reporting cost; resources and logistics; planning; scheduling; risk; investment appraisal; and profitability of engineering activities, products and projects.

Members: Members work in a number of areas including: estimating; cost engineering; quantity surveying; planning and scheduling; financial and commercial management; value engineering; project control; project management; risk management; quality assurance; and contracts.

 **Approximate number of members:** 1,630 individual and ten company members.

Agreements to register members: Institute of Highway Engineers (IHE).

Association of Polish Engineers in Great Britain (STP)

Established in 1940. Incorporated in 2008.

Sector: Disciplines of engineering and technical science

 **About:** Association of Polish Engineers in Great Britain is an independent, self-governing technical and scientific organization that brings together engineers, architects, scientists, technicians and students living and working in the United Kingdom. The Association includes individuals and institutions representing various disciplines of engineering, technical sciences, as well as enthusiasts of broadly understood science and technology.

Mission: Our mission is to advance education of the public in the subjects of construction, engineering and science:

- by providing training, lecturers and organising conferences
- by providing mentoring and coaching programmes
- by providing a meeting forum for interchange of ideas and information on the construction, engineering and science subjects.

 **Approximate number of members:** 150 (individual and corporate members).

 **Grades of Membership:** Honorary Member (HonMSTP), Member (MSTP), Associate Member (AssocMSTP), Affiliate Member (AffilMSTP), Corporate Member (CorpMSTP).

 **Specialist interest groups:** Numerous, including: mentoring group, promotion of science and engineering among youths, Building Information Management (BIM), Thursdays4U group (monthly talks), Technical Academy group organising training and courses.

Chartered Quality Institute (CQI)

Established in 1919. Incorporated by Royal Charter in 2006.

Sector: Industry; commerce; the public and voluntary sectors

 **About:** The CQI is the professional body for experts in improving product, project and service quality. For more than 100 years, we've been championing organisational excellence by setting professional standards for quality management in the UK and globally. With 18,000 members in 100 countries, we are the partner of choice for quality management practitioners and, through our International Register of Certificated Auditors (IRCA) certification, for systems audit professionals.

Vision: Our vision is a world in which organisations of all types and sizes thrive by providing outstanding value for customers, stakeholders and society.

Members: CQI is the only professional body able to award Chartered status to those whose job it is to deliver excellence in organisations. Quality management is a broad discipline and membership of the CQI caters for both individuals who have wide-ranging roles, and those that may specialise in aspects ranging from business improvement to audit and customer insight.

 **Approximate number of members:** 18,000

 **Grades of Membership:** Student; Affiliate; Practitioner (PCQI); Chartered Quality Professional Member (CQP MCQI); Chartered Quality Professional Fellow (CQP FCQI).

 **Specialist interest groups:** Eight.

Institute of Cast Metals Engineers (ICME)

*First established in 1904 as the British Foundrymen's Association.
Incorporated by Royal Charter in 1921.*

Sector: Foundry and castings industry

 **About:** ICME exists to support the education of individuals in the castings industry and to provide technical information and professional development opportunities to its members, to enable them to make the best of their careers in the industry.

ICME is a registered End Point Assessment Organisation: we aim to be recognised in the UK as the lead organisation for the End Point Assessment (EPA) of apprentices in the industry and for the professional development of individuals. We want employers in the casting sector to recognise ICME as their key partner for professional development through the work we and our members do to develop nationally recognised courses and qualifications.

Mission: To bring together people from all sectors and levels, to offer help and advice, technical support and professional development opportunities, helping members make the most of their careers in the castings industry.

Members: Members include castings engineers, die casters, foundry workers, design engineers, metallurgists, moulders, patternmakers, CAD technicians, methods engineers, researchers, students and suppliers to the industry.

The Institute of Quarrying (IoQ)

Established in 1917.

Sector: Mineral extraction and processing technology

About: The Institute of Quarrying is the global professional body for individuals who work, operate in and supply products and services to the mineral extractives and processing industry. The home of the Institute is based in the UK but it also has Affiliated National Institutes (ANIs) in Australia, New Zealand, Hong Kong, Malaysia and Southern Africa.

Mission: The key role of the Institute is to provide education, knowledge and practical skills to further enhance and develop the science of quarrying and mineral processing.

Members: Members work across a wide range of skills areas, which cover all aspects of mineral extraction and mineral processing ranging from skilled operatives; technical disciplines; surveying; health; safety; and environmental professionals through to senior managerial positions.

Approximate number of members: Over 3,500 in the UK and over 6,500 globally.

Agreements to register members: Chartered Institution of Highways & Transportation (CIHT).

Incorporated in 2016.*

Sector: Industrial and commercial refrigeration engineering, process industries, and climate control, air conditioning and heat pumps

 **About:** IOR is a central meeting point for people from all over the world to promote, improve and learn more about refrigeration, air conditioning and heat pumps.

Mission: To promote the technical advancement of refrigeration and air conditioning in all of its applications for the public benefit, with a strong emphasis on reducing environmental impact. To achieve this, the Institute encourages invention and research, as well as facilitating communication and the exchange of expertise and views. It provides a central forum for all those involved professionally in refrigeration science and engineering practice and communicates knowledge of refrigeration, air conditioning and heat pumps and their benefits to society.

Members: Members have a professional interest in the practice of refrigeration, air conditioning and heat pump technologies in all of their applications. They are drawn from all aspects of the sector including: technicians; engineers; managers; scientists; and researchers.

 **Approximate number of members:** 2,000

Agreements to register members: Chartered Institution of Building Services Engineers (CIBSE).

 Registration agreement covers:	EngTech	IEng	CEng	
Registered members:	3	-	7	

 **Grades of Membership:** Affiliate; Technician (TMinstr); Pre-Associate; Associate (AMInstr); Member (Minstr); Fellow (FInstr).

 **Specialist interest groups:** Technicians, Women in RACHP, Environment.

Charitable Incorporated Organisation No: 1166869

Institute of Telecommunications Professionals (ITP)

Established in 1906. Incorporated in 2002.

Sector: Telecommunications

 **About:** ITP is the leading independent body for the telecommunications industry. It represents thousands of members drawn from hundreds of businesses. Formerly known as the Institute of Post Office Engineers (IPOEE) and the Institution of British Telecom Engineers (IBTE), the ITP has a proud heritage, dating back to 1906. The ITP collaborates with regulators, government associations and other leading bodies on a wide variety of projects that are important to the future of the industry, representing the views of its members.

Mission: The ITP is dedicated to promoting the professional and career development of its members through professional registration, knowledge seminars, insight visits and its industry leading publication, *The Journal*.

Vision: With a rich history as the voice of telecoms for more than a century, the ITP's vision is to help shape the future of professional telecommunications. The ITP Apprenticeship Scheme looks to provide a constant flow of highly trained, well qualified individuals into the telecoms sector.

Members: Members range from apprentices and individuals right through to major corporate players.

 **Approximate number of members:** 4,000

Agreements to register members: Institution of Engineering and Technology (IET).

Registration agreement covers:	EngTech	IEng	CEng	ICTTech
Registered members:	1	5	3	9

Grades of Membership: Apprentice/Student (MITP); Graduated Apprentice (MITP); Full Individual (MITP); Retired (MITP); Fellow (FITP).

The Institute of Traffic Accident Investigators (ITAI)

Founded in 1988.

Sector: Engineering, road traffic accident/collision investigation and vehicle examination

About: ITAI is a registered charity, is a non-profit making institution and has no paid staff – all work is conducted on a voluntary basis. It provides a means for communication, education, representation, and regulation in the field of traffic accident investigation. It represents the interests of those involved, at all levels, in the investigation of road traffic accidents/collisions.

Aims and Objectives: The aim of the Institute of Traffic Accident Investigators (ITAI) is to promote road safety for the benefit of the public by improving the technical and general knowledge and skills of persons involved in the field of investigating road traffic collisions. It promotes the free and open exchange of knowledge and provides a forum for communication, education and representation, throughout which it aims to enhance expertise.

It also seeks, through the collective knowledge of its members, to improve the standards of safety of vehicles and roads of all kinds.

The Institute is committed to promoting a professional approach to traffic accident investigation by encouraging honesty and integrity among investigators.

Approximate number of members: 500 throughout the world.

Agreements to register members: Institute of Highway Engineers (IHE).

Registration agreement covers:	EngTech	IEng	CEng	ICTTech
Registered members:	-	-	-	-

Grades of Membership: Student; Affiliate; Associate; Full; Retired and Honourary.

Institution of Power Engineers (IPowerE)

(Formerly Institution of Diesel and Gas Turbine Engineers)

Established in 1913. Incorporated in 2010.

Institution of
Power Engineers

Sector: Power and energy

 **About:** IPowerE is the professional institution for engineers and technicians involved in the power industry worldwide, the word 'power' being taken in its broadest sense to include electrical generation, renewable power, energy storage, mechanical drive, marine propulsion, rail traction, hybrid drive systems and energy networks.

Mission: To serve our members and the industry by encouraging the sharing of knowledge in the field of power and energy and to advance conceptual thought, design, development, manufacture, application, operation and maintenance of power and energy plant and systems. We strive to be the leading independent international forum for networking and promotion of knowledge in the field of power and energy.

Members: Members are engineers, engineering technicians, companies and academic partner organisations in the power and energy industries and related fields.

 **Approximate number of members:** 350

Agreements to register members: Society of Operations Engineers (SOE).

Registration agreement covers:	EngTech	IEng	CEng	
Registered members:	19	1	4	

Grades of Membership: Member (MIPowerE); Fellow (FIPowerE); Associate (AMIPowerE); Student; Young Engineer; Retired; Retired Associate; Company; Academic Partner; Subscriber.

Specialist interest groups: Gas turbines; reciprocating engines; renewable power; energy storage technologies; power systems and heritage.

International Institute of Obsolescence Management (IIOM)

*Established in 1997 as the Component Obsolescence Group,
Incorporated 2015.*

Sector: Obsolescence management, through-life engineering, risk management

 **About:** IIOM is a not for profit organisation that exists to advance the science and practice of obsolescence management and related activities. IIOM is dedicated to improving the knowledge and best practice of obsolescence practitioners through initial and continuing professional development.

Mission: To promote discussion, solution sharing, and capability improvement in managing obsolescence of components, materials, software, information, knowledge, experience, processes, facilities and people. The increasing impact of this problem on a global scale is the major driver for the continued expansion of IIOM, and there is particular interest in mitigating the impact on the viability of long-life products and systems.

Members: The Institute is for professionals worldwide who are dedicated to furthering their knowledge and understanding of the obsolescence management discipline and who wish to network with a wide group of individuals and organisations from a global membership. Members join their local Chapter and come from all industry sectors and all levels of the supply chain.

 **Approximate number of members:** 800 worldwide.

 **Grades of Membership:** Individuals at Affiliate; Associate (AIIOM); Member (MIIOM); Fellow (FIIOM) grades. Corporate membership is open to companies, academia and government organisations.

 **Specialist interest groups:** IOM is highly active in the areas of: sustainability; avoidance of counterfeit components and materials; and legislation restricting the use of hazardous materials such as REACH and RoHS. Members play a leading role in the development of international standards and accreditation.

[Member benefits](#)

 **Structure:** Active Chapters in Germany, India, the UK and USA. Further Chapters are under development in several other territories.

NAFEMS

Established in 1983. Incorporated in 1990.

Sector: Analysis and simulation

 **About:** NAFEMS is the only association dedicated to the engineering analysis community. It provides vital 'best practice' information specifically for those involved in finite element analysis, computational fluid dynamics, and computer aided engineering, ensuring safe and efficient analysis methods.

Over the past 35 years its mission has been to: facilitate international industry, academic and government collaboration that leverages unbiased multi-disciplinary engineering expertise; improve product and process simulation; have a positive impact on quality, profitability, schedules and safety.

Mission: Provide knowledge, international collaboration and educational opportunities for the use and validation of engineering simulation.

Members: Companies that operate in a broad range of industries, academia and vendors.

 **Approximate number of members:** 1,500 company members.

 **Grades of Membership:** (Company membership only) Entry; Standard; Corporate Select; Corporate Global; Academic.

 **Specialist interest groups:** Numerous technical working groups, including: analysis management; dynamics and testing; geotechnics; and simulation data management.

[Member benefits](#)

 **Structure:** Nine regional groups worldwide.

Royal Institute of Navigation (RIN)

Established in 1947. Incorporated by Royal Charter in 2007.

Sector: Positioning, navigation and timing

 **About:** RIN is a learned society, incorporated under Royal Charter, whose objective is to advance the art, science and practice of navigation. The organisation achieves this by bringing together interdisciplinary teams to share experiences and knowledge. The meta changes of the 21st Century are anchored and enabled through positioning, navigation and timing technology – for example smart devices, drones or driverless cars.

Mission: To unite in one body those interested in navigation and to promote knowledge in navigation, timing, tracking and conduct of a journey whether on, in, over or under land, sea, air or space.

 **Approximate number of members:** 2,000

Agreements to register members: Royal Aeronautical Society (RAeS).

Registration agreement covers:	EngTech	IEng	CEng	
Registered members:	-	-	6	

Grades of Membership: Fellow (FRIN); Associate Fellow (AFRIN); Member (MRIN); Student.

Specialist interest groups: Future positioning; navigation and timing; space; land navigation and location; general aviation; civil and air navigation; marine navigation; small craft; cognitive navigation; animal navigation.

Engineering Council Standards

- **UK-SPEC** The Engineering Council revises the Standards every five years. The latest edition of UK-SPEC will be implemented from 31 December 2021 and of the *ICTTech* Standard from 31 March 2022. More information and downloadable versions are available at: www.engc.org.uk/standards
- **ICTTech Standard** - sets out the competence and commitment required for registration as an *ICTTech*
- **Accreditation of Higher Education Programmes (AHEP)** - sets out the standard for degree accreditation
- **Approval and Accreditation of Qualification and Apprenticeships (AAQA)** - sets out the standard for approval and accreditation of a wider variety of programmes, including those designed to develop engineering competence.
